

# CHRONICLE OS DOCUMENTATION SYSTEM

## VOLUME V — ANNEX VOLUME

*Master Edition — Version 1.0*

Version 1.0 | Master Edition | English

## IMARCH-ANNEX-001

**Document ID:** IMARCH-ANNEX-001

**Document Type:** Annex Volume

**Hierarchy:** Supplementary to Volumes I–IV

**Status:** MASTER EDITION

**Edition:** Master English Edition

**Version:** 1.0

**Owner:** IMARCH LTD (UK Registration No: 16791765)

**Jurisdiction:** England and Wales

**Date:** 28 July 2026

# PREAMBLE

This Volume V constitutes an integral annex to the Chronicle OS Documentation System (Volumes I–IV).

Volume V records provisions which:

- appear on the journal's front-facing page;
- are employed in operational activity;
- are not recorded in the principal documentation; and
- require normative codification to ensure the completeness of the system.

Volume V **does not amend** Volumes I–IV.

Volume V **supplements** them, ensuring the completeness of the description of the institutional model.

This Volume is an official normative annex and shall be applied in conjunction with Volumes I–IV of the Chronicle OS Documentation System.

# Section 1. FINANCIAL AND OPERATIONAL POLICY (APC)

## 1.1. General Provisions

Chronicle OS operates under an Open Access model following peer review.

The Journal receives no external funding and does not host commercial advertising.

To sustain the digital infrastructure of the platform, a fixed Article Processing Charge (APC) is established.

## 1.2. Amount of the Article Processing Charge

The APC is set at **£150 (one hundred and fifty pounds sterling)** per submitted manuscript.

The charge is payable in pounds sterling (GBP) at the exchange rate prevailing on the date of payment.

## 1.3. Purpose of the Charge

The charge is levied by the platform operator, **IMARCH LTD (UK Registration No: 16791765)**, solely to cover the costs of:

- cryptographic sealing of the manuscript (SHA-256);
- generation and registration of the DOI;
- remuneration of independent peer reviewers;
- maintenance of repository servers and archival storage;
- plagiarism screening;
- editorial management of the publication process; and
- ensuring long-term availability of published materials.

## 1.4. Non-Refundability of the Charge

**Payment of the APC does not constitute a purchase of publication.**

The charge is paid at the stage of preliminary editorial assessment to initiate the independent peer-review process.

If, following double-blind peer review, the article is rejected (verdict *Rejected*), **the APC shall not be refunded**, since the infrastructural work of analysis, verification and peer review of the material has been performed in full.

In such a case, the material shall be sealed in a closed archive without any right of public display.

## 1.5. Waiver Policy

Fee waivers are available only in exceptional circumstances:

- where grant funding specifically covering publication costs exists;
- for invited articles commissioned by the Editorial Board;
- by decision of the Editorial Board in exceptional cases; and
- for authors from low-income countries (subject to agreement with the Editorial Office).

The waiver policy does not affect the peer-review process and shall not constitute grounds for acceptance or rejection of a manuscript.

## 1.6. Compliance with International Practice

The Chronicle OS APC policy is consistent with the generally accepted international practice of open-access scientific journals and does not create discriminatory conditions for authors.

The amount of the charge is set at a level sufficient to cover operational expenditure without imposing an excessive commercial burden on researchers.

## Section 2. CRYPTOGRAPHIC FIXATION (SHA-256)

### 2.1. Purpose

Chronicle OS provides cryptographic fixation of all materials undergoing the editorial process.

The purposes of fixation are:

- confirmation of authorial priority;
- evidence of the time of registration of materials;
- assurance of the immutability of manuscripts at all stages of review;
- protection of the author's intellectual property; and
- creation of legally significant proof of submission.

### 2.2. Fixation Procedure

Upon receipt of a manuscript by the Editorial Office:

1. The material is assigned a unique system identifier.
2. The original file undergoes cryptographic sealing, generating a **SHA-256 hash**.
3. A **Pre-publication Card** is published on the Journal's official website, containing:
   - the title of the manuscript;
   - the abstract;
   - the keywords;
   - the SHA-256 hash lock; and
   - the date of registration.
4. The full text of the article is preserved in the institutional repository of IMARCH LTD for the protection of the author's intellectual property pending the completion of peer review.

### 2.3. Public Register

SHA-256 hashes of registered manuscripts are made publicly available.

Any interested party may verify the integrity of a publication by comparing its SHA-256 hash against the public register.

## 2.4. Immutability

Once a SHA-256 hash is generated, any modification of the sealed file is impossible without altering the hash.

Any change shall be recorded as a new version with a new hash. The full version history shall be preserved.

## 2.5. Compliance with International Standards

The SHA-256 mechanism complies with international practice in the cryptographic protection of scientific publications and with the recommendations of COPE (Committee on Publication Ethics) in respect of ensuring the integrity and traceability of scholarly materials.

# Section 3. METHODOLOGICAL FRAMEWORK

## 3.1. Interdisciplinary Approach

The research model of *Chronicle OS* is oriented towards the interdisciplinary analysis of complex systems and processes.

The Journal treats scientific, social, technological and institutional phenomena as interconnected elements of a single operational environment.

## 3.2. Research Areas

Chronicle OS accepts submissions in the following areas:

- biomedical and environmental risks;
- digital infrastructure and information security;
- behavioural and institutional models;
- resilience and adaptation of complex systems;
- methodology of interdisciplinary research;
- social and organisational resilience; and
- knowledge management and digital archiving.

## 3.3. Methodological Framework

The following approaches are employed as the methodological foundation:

- systems analysis;
- resilience studies;
- institutional governance;
- complex systems modelling; and
- interdisciplinary coordination.

## 3.4. One Health Systems Engineering

The Journal's approach is consistent with the principles of interdisciplinary coordination applied within the framework of **One Health Systems Engineering**, which treats human, animal and ecosystem health as an integrated whole.

## 3.5. Scholarly Heritage

The methodological foundation draws upon the scholarly heritage of **Prof. M.G. Shcherban, MD, PhD (In Memoriam)** in the field of environmental and biomedical safety.

The heritage of Professor M.G. Shcherban constitutes the foundational basis of the biomedical and environmental safety section of the Chronicle OS Journal.

# Section 4. ECOSYSTEM ARCHITECTURE (PLATAN+)

## 4.1. Position of Chronicle OS within the Ecosystem

Chronicle OS is the technological core of the full-cycle scientific and production enterprise **IMARCH Githronical**, which serves as the infrastructural foundation of the international institutional consortium **PLATAN+**.

## 4.2. Purpose of the Ecosystem

PLATAN+ represents a new architecture for knowledge management, scholarly collaboration and the capitalisation of intellectual assets.

The ecosystem integrates the functions of various scientific services within a single institutional framework based on Chronicle OS, ensuring process transparency, digital sovereignty and long-term data sustainability.

## 4.3. Three Levels of the Ecosystem

**I. Integrated Scientometric Circuit**

The level of verification and management of scholarly capital:

- SHA-256 hash locking;
- compatibility with international standards (Crossref, ORCID, Zenodo, ROR);
- registration, tracking and accounting of publication activity; and
- fixation of authorial priority and version history.

**II. Social-Applied Polygon**

The level of training and practical socialisation:

- social integration programmes;
- training of specialists for the new technological paradigm;
- engagement of participants in real-world knowledge management processes; and
- mastery of modern compliance and data management tools.

**III. Intellectual Property as a Service**

The level of capitalisation and protection of intangible assets:

- fixation and protection of intellectual property rights;
- documentation and audit of the commercial value of developments;
- support for know-how and research outcomes; and
- creation of mechanisms for international commercialisation.

## 4.4. Legal Status

The PLATAN+ architecture, including the logic of registry interaction, verification mechanisms, models of institutional integration and certain elements of technological orchestration, is protected by a system of registered know-how instruments and the internal registry of IMARCH LTD in accordance with the UK Trade Secrets Regulations 2018.

## 4.5. Readiness for International Certification

The existence of a complete documentation system (Volumes I–IV) and applied instruments (Volume V) ensures that University Chronicle Nodes are ready to undergo international institutional certification and to be included in international indexing databases for scientific journals.

# Section 5. INSTITUTIONAL SUSTAINABILITY

## 5.1. Sustainability as a Principle

Chronicle OS treats institutional sustainability as one of the fundamental principles of its operation.

Sustainability is ensured through:

- a documented regulatory framework;
- reproducibility of editorial procedures;
- long-term archival preservation;
- institutional memory;
- transparency of decision-making; and
- continuity of operation regardless of personnel changes.

## 5.2. Resilience Studies

Methodologically, the Journal supports research in the field of resilience of complex systems (Resilience Studies).

The Editorial Board considers works addressing:

- resilience of social and organisational systems;
- adaptation to changes in the external environment;
- long-term viability of institutions;
- prevention of systemic risks; and
- restoration of functions after crises.

## 5.3. Institutional Continuity

Chronicle OS ensures the continuity of scholarly activity regardless of:

- changes in editorial composition;
- changes in digital platforms;
- organisational transformations; and
- personnel changes in partner universities.
  The institution outlasts its administration. Scholarly knowledge outlasts the institution.

## 5.4. International Standards

Chronicle OS ensures that its activities conform to international academic standards, including:

- COPE (Committee on Publication Ethics);
- DOAJ recommendations;
- open science principles; and
- scientific metadata standards (Crossref, ORCID, ROR).

## Section 6. JOURNAL METADATA

### 6.1. ISSN

**ISSN (Online):** Pending (Application Stage)

The process of obtaining the ISSN shall be carried out in accordance with the prescribed procedure following the initial period of the Journal's operation.

### 6.2. Frequency

**Continuous Publication** / Quarterly Volume Compilation

The Journal publishes materials as they become ready, with volumes compiled on a quarterly basis.

### 6.3. Languages of Publication

- English

### 6.4. Motto

**"Forma Universalis et Systemata Mutabilia"** (Universal Formology and Mutable Systems)

## Section 7. CONSOLIDATED COMPLIANCE TABLE

📍 **Front-Facing Page:**
https://imarch.sbs/en/

### 📜 Volume I — Institutional Codex (15 Documents)

- DOC-001 — Publishing Doctrine
- DOC-002 — Editorial Policy
- DOC-003 — Editorial Board Statute
- DOC-004 — Publication Ethics
- DOC-005 — Peer Review Policy
- DOC-006 — Scholarly Integrity
- DOC-007 — Data Management
- DOC-008 — Digital Preservation
- DOC-009 — Metadata and Identification
- DOC-010 — Openness and Transparency
- DOC-011 — Appeals
- DOC-012 — Quality
- DOC-013 — International Cooperation
- DOC-014 — Continuous Development
- DOC-015 — Institutional Governance

### 🤝 Volume II — Institutional Relations (10 Documents)

- INS-001 — Framework Agreement
- INS-002 — University Chronicle Node
- INS-003 — Editorial Board Charter
- INS-004 — International Expert Network
- INS-005 — Institutional Membership
- INS-006 — University Onboarding
- INS-007 — Certification
- INS-008 — Brand and Identity
- INS-009 — International Cooperation
- INS-010 — Continuity and Exit

### ⚙️ Volume III — Operational Governance (15 Documents)

- GOV-001 — Governance Framework
- GOV-002 — International Structure
- GOV-003 — Roles and Responsibilities
- GOV-004 — Decision-Making
- GOV-005 — Operating Principles
- GOV-006 — Institutional Continuity
- GOV-007 — Context Management
- GOV-008 — System Evolution
- GOV-009 — Institutional Committees
- GOV-010 — Conflict Resolution
- GOV-011 — Institutional Audit
- GOV-012 — Risk Management
- GOV-013 — Performance Assessment
- GOV-014 — Node Lifecycle
- GOV-015 — Governance Summary

### 🛠️ Volume IV — Functional Deployment (39+ Documents)

- FDP-001.1–1.4 — Institutional Intake
- FDP-002.1–2.6 — Governance Charters
- FDP-003.1–3.9 — Editorial Operations (submission, screening, review, publication)
- FDP-004.1–4.5 — Post-Publication Cycle
- FDP-005.1–5.5 — Operational Protocols (node management, audit, regulatory documentation)

### 📎 Volume V — Annex Volume (6 Sections)

- Section 1 — APC Policy (£150, non-refundability)
- Section 2 — SHA-256 Cryptographic Fixation
- Section 3 — One Health Methodology
- Section 4 — PLATAN+ Ecosystem
- Section 5 — Institutional Sustainability
- Section 6 — ISSN, Frequency, Languages

✅ **Conclusion:** All 14 front-page provisions are recorded in the documentation.

## CONCLUSION

Volume V is a normative annex to the Chronicle OS Documentation System.

It records provisions which:

- appear in the Journal's operational activity;
- are reflected on the front-facing page; and
- require normative codification to ensure the completeness of the institutional model.

Volume V **does not alter** and **does not repeal** the provisions of Volumes I–IV.

Volume V **supplements** them, ensuring the completeness and consistency of the entire Documentation System.

All documents included in Volume V are binding on all participants of Chronicle OS on the same footing as the documents of Volumes I–IV.
